DETAILED ACTION

1) Acknowledgement is made of Amendment received 9/24/2004. The species restriction is withdrawn in view of Applicants' arguments.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2) Claims 1-21, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 2-3, recite a "pulp bleaching stage". It is not clear if a "pulp bleaching stage" is a structural limitation.

Claim 1, is not clear by line 14 recitation of "a second stage stabilizing chamber following said second mixer". The specification and the drawings indicate however that the second stage stabilizing chamber is following the third mixer. Clarification is required.

Claim 7, line 2, recites an "extraction stage". It is not clear if an "extraction stage" is a structural limitation.

Claim 9, line 2, recites a "chlorine dioxide stage". It is not clear if a "chlorine dioxide stage" is a structural limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3) Claims 1-11, 13-21, are rejected under 35 U.S.C. 102(b) as being anticipated by Tsai (5,389,201).

Claims 1, 17, 21: Tsai discloses a pulp bleaching system that includes first chlorination stage 22, followed by washer 24, followed by first mixer 26 to which a chemical is added, followed by second mixer to which another chemical is added, followed by reaction tower 34, followed washer 36 which is a mixer since a substance, water, is added therein, followed by reactor 38 (col. 3, line 29 to 28, and Figure 2).

Claims 2-6: the reaction chamber size limitation by the reaction time is a method and not a structural limitation.

Claims 7, 9, 14-16, 18-20, are method limitations.

Claims 8, 10-11: reactor 38 is disclosed.

Claim 13: pH control is set up at reactor exit (col. 5, lines 10-20).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1731

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4) Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tsai in view of Shackford (6,340,409). Tsai is applied as above for claim 1, Tsai is silent on the first mixer being a pump. Shackford discloses a bleaching system wherein the first mixer is pump 20 (col. 2, lines 6-53, and Figures 1, 2). It would have been obvious, to one skilled in the art at the time the invention was made, to combine the teachings of Tsai and Shackford because such a combination would provide for pumping of a thick stock in the system of Tsai as disclosed by Shackford (col. 2, lines 6-14).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
